TO OUR BRAND PARTNERS

Thank you for your hard work and dedication. Your success in sharing our great products is to be applauded, and we're excited about LifeWave's future. We have created this document to provide guidance and help you understand what can and cannot be said about LifeWave products.

Regulatory authorities both locally and across the globe have taken the position that all claims surrounding healing, even those from natural products, will be regarded as a drug claim.

After a review of our product positioning with our advisors, LifeWave has determined that the best way to protect its brand and business is to avoid claims that include any mention of diseases, medical conditions, suggestions of healing, curing, etc. Following the guidance in this document will allow us to remain in the General Wellness category and will insulate us from future scrutiny by the regulatory authorities.

GENERAL GUIDANCE

LifeWave products are general wellness products. This means that a Brand Partner may only discuss how the products are designed to maintain or encourage a general state of health or healthy activity.

OTHER CLAIMS

PHOTOTHERAPY

What is Phototherapy?

Claims you can make

The science of phototherapy, which has been around for about 100 years, uses light to improve the health of the body. As far back as two thousand years ago, the ancient Greeks had a center for studying the effects of different colored lights on the body. Even the ancient Egyptians, who promoted health by focusing sunlight through colored glass on certain areas of the body, understood this concept .

Claims you cannot make

“Modern forms of phototherapy such as low-level laser therapy, which helps reduce wrinkles and treat other more serious skin conditions”.

How do our Phototherapy Patches Work?

Your body emits heat, including heat in the infrared spectrum. Our patches are designed to trap this infrared energy when placed on the body, which causes them to reflect it back to stimulate specific points on the skin that can promote a general state of health and healthy activity unique to each LifeWave patch.

Your body emits heat in the form of infrared light. Our patches are designed to trap this infrared light when placed on the body, which causes them to reflect particular wavelengths of light. This process stimulates specific points on the skin that signal the body to produce health benefits unique to each LifeWave patch.

What makes one LifeWave patch different from another?

Each patch is exclusively designed to reflect particular wavelengths of energy that stimulate specific points on the skin. This enables each patch to provide unique wellness benefits to the user. NO DRUGS OR STIMULANTS enter your body.

Each patch is exclusively designed to reflect particular wavelengths of light that stimulate specific points on the skin. This enables each patch to provide unique health benefits (e.g., feeling the pain reduction, feeling the increased energy, etc.). No drugs or chemicals enter your body.
