

What to Expect When You Start Wearing X39?

First Few Days: Up to 4,000 genes begin to reset

Within 4-6 Weeks: Cellular repair activates, Brain begins to rebalance

3-6 Months: Collagen increases, recovery quickens

By 12 Months: You don't just feel better—you look and live younger

Imagine:

- Waking up with natural, steady energy
- Deep, restorative sleep
- A clearer, calmer mind
- Smoother, younger looking skin
- Faster recovery from exercise or daily life
- Regeneration that starts from within

Don't be fooled by copycat patches - only use authentic, patented technology.

About Us

David Schmidt
Founder, Inventor, CEO

For more than 20 years, LifeWave's regenerative technologies have helped people feel better, look younger, and live more vibrant lives.

Currently, David holds over 200 global patents with over half in the field of regenerative science.

Curious about how this fits into your own health journey?

LOOKS SIMPLE. WORKS LIKE MAGIC.

Boost Your Peptides + Stem Cells
- with Zero Injections!

Aging Doesn't Happen Overnight. Aging happens gradually, slowly.

As we age, our natural repair cells – stem cells, slow down.

We heal a little slower, wake up a little stiffer and we start to notice it everywhere:

- Everyday aches & stiffness
- Restless nights
- Slower recovery
- Lower energy and focus
- Persistent inflammation
- Fine lines & thinning hair

A New Way to Turn On Our Body's Own Healing Power.

After 10 years of stem cell research we discovered a simple way to use light to signal our body's own cellular production.

The X39 patch is a wearable, non-transdermal patch with real results backed by science, clinical studies and multiple **global patents**.

- No drugs.
- No needles.
- No side effects.

Just light—sending a signal your body forgot . . . *until now.*

The **X39 patch** reflects specific wavelengths of light that stimulate your skin to elevate GHK-Cu, the **copper peptide** clinically proven to repair and regenerate damaged cells.

GHK-CU Copper Peptide

GHK-Cu is your body's own "*super peptide*" — The master switch that turns your body's healing capacity back on.

The X39 patch is clinically proven to **elevate GHK-Cu back to youthful levels**.

Even if you don't feel something immediately, your cells are already working — repairing what matters most first, then moving to the things you can see and feel.

How to Use the Patch

Simply peel and stick!

1. **Apply** to clean, dry skin
2. **Wear** 12 hours on, then 12 hours off
3. **Discard** or place on your pet
4. **Wear** a new patch daily

Drink plenty of water for best results
